

EvoCoating RAILWAY COATINGS

MADE IN GERMANY

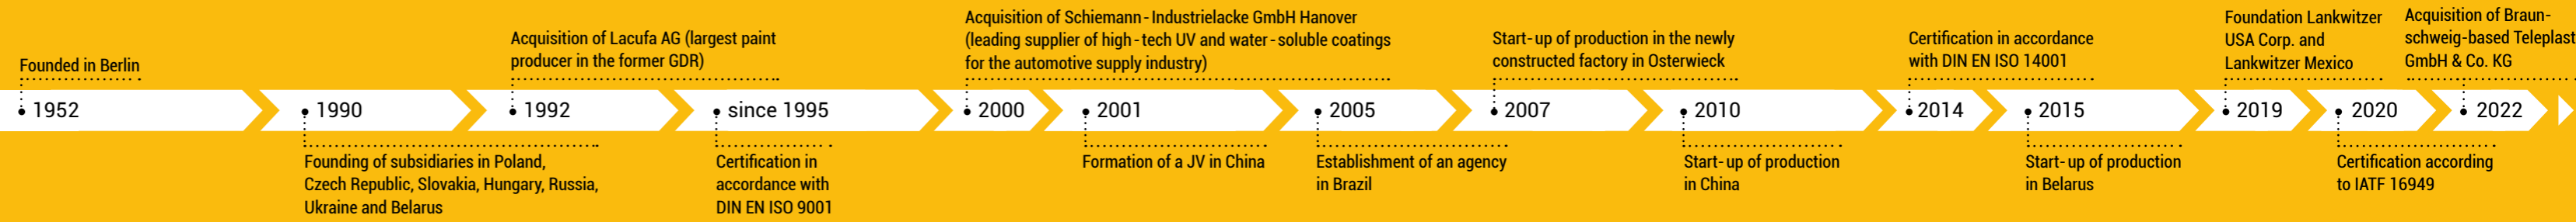

► The Company

WORLDWIDE ACCLAIM, MADE IN GERMANY

Founded in Berlin in 1952, LANKWITZER has become established worldwide as a premium supplier for industrial coating systems. LANKWITZER's trademarks are top-class quality 'Made in Germany', a high degree of flexibility, outstanding innovative strength and a consistently customer-driven mindset. The key to our success is the global availability of all our products and ongoing customer support provided by a highly-qualified team of developers and engineers.

Our product range is already successfully in use on a global level in line with the relevant requirements of the railway sector and has proven itself superior in hundreds of projects. Our many years of expertise guarantee you customized solutions, even for more complex projects, supervised by your personal key account manager and application engineer. Assistance with painting processes, sophisticated logistics and just-in-time deliveries, as well as support from design development through to the production stage, complement the worldwide service we provide for our customers.

► Company History

► Locations

WITH LANKWITZER COATINGS ... YOU'RE ALWAYS ON THE RIGHT TRAIN

For over 50 years, LANKWITZER has been globally acknowledged as a leading paint manufacturer for the coating of rail vehicles. With more than 15 locations in Europe, Asia and the USA as well as five production facilities, we are your competent, reliable partner in the railway sector.

Our product range provides you with coating solutions that we are constantly advancing and refining in accordance with the latest requirements of rail vehicle manufacturers and railway companies. Our paint systems are industry leaders in both solvent-based and water-based systems. We always take innovations in raw materials research into account in our laboratories and of course we incorporate them when refining our existing products and developing new ones. As a result, we can offer you new opportunities and improvements in your coating process at a moment's notice.

Customized system solutions — specialists at your disposal

- Sustainable products developed to meet your requirements for all areas of application
- Global logistics solutions
- Global support for application engineering
- Project development in close collaboration with the customer through to the production stage
